## **Quick to Install, Non-Combustible, Corrosion Resistant & Compatible with Multiple Surface Materials**

**PLAN DECK LTD** have developed the most advanced, quickest and easiest pre-assembled, multiple surface decking support system available on the market. The framework will support any type of decking; Timber, Composite or Aluminium as well as Porcelain Tiles, Artificial Turf or a combination of these making it the most versatile solution available.

**PLAN DECK** can also be used as a support framework for Sheds, Outdoor Buildings or Garden Rooms.

When used with **Aluminium Decking** or **Porcelain Tiles** our complete solution is Non-Combustible making it the ideal solution for Balconies and Roof Terraces where an A2 Fire rated product must be installed.

Frames are supplied in manageable pre-assembled modular sections making our kits installation straightforward and time efficient, cutting labour costs in half compared to alternative solutions.

**We are able to supply the full package, bespoke sub-frames including the surface material of your choice. Installation can be organised through our network of partners in the UK.**

# PORCELAIN TILES NON-COMBUSTABLE

**Our PLANSAFE GUARD Porcelain Tiles are a quality range of vitrified structural tiles for use outdoors.**

Offering a comprehensive range of characteristics and finishes from natural stone, granite, woodgrain and glazed porcelain, available in a variety of colours and shades.

Our range of tiles are 20mm thickness, ideal for use externally as a structural tile. All the tiles are available in 595mm x 595mm Square [60X60] or 895mm x 595mm rectangular [90x60], allowing for a stylish and contemporary looks.

When used with our PLAN DECK ALUMINIUM SUBSTRUCTURE, It is possible to tile over membraned roofs, leaving any integrated drainage untouched. Use over uneven ground without the need for major ground work allowing indoor and outdoor spaces to seamlessly flow.

**Made with outdoors in mind the Anti-slip surfaces are perfect for maintaining safety, in all weathers. Easy to clean and maintain.**

See Pages 8 & 9 for more product details

### **GROUND:** *Matt Finish & Anti-Slip*

A collection inspired by the look and feel of hydraulic flags with an a cotto structure. Modern vintage look fits the latest design

See Pages 10 & 11 for more product details

### **WILDWOOD:** *Matt Finish & Anti-Slip*

A creation that bridges the beauty of nature and human creation. A new concept of tiles with the beauty of wood in ceramic form.

See Pages 12 & 13 for more product details

# AVENUE

## IGNEOUS STONE COLLECTION

**The Avenue collection makes the reinterpretation of a stone that combines the characteristic aspects of granite with that of basalt.**

A collection of outdoor structural tiles with a strong personality.

Having been developed by utilising digital printing technology, it allows higher graphic diversity and a reduction of pattern repetition.

Its surface is slightly structured so that it can be used outdoors and under more extreme weather conditions. Its finish significantly reduces the chances of slipping for those circulating outdoors.

This collection is available in a 20mm thick 595x595mm square size.

The technical characteristics of this product enable its application in gardens and public spaces, parking lots, pavements and pedestrian accesses, industrial areas and urban areas amongst others.

An ideal product for use near swimming-pools, with adapted tiles that enable its use in pool complexes and holiday resorts, namely, in the swimming-pool surrounding areas.

# CANYON

## SEDIMENTARY STONE COLLECTION

**The Canyon collection takes inspiration from natural stones with a range of colours and textures similar to cut sandstone flags.**

Manufactured in glazed porcelain for use outdoors, the tiles are not porous despite looking like natural stone with natural stone grain. This means they will not absorb moisture or stains like natural stone.

Its surface has a slight rough texture to give it that natural sandstone feel and interesting touch. It can be used outdoors and under more extreme weather conditions. Its finish reduces the chances of slipping for those walking on the tiles outdoors.

Available in 3 natural colours, the tiles are 20mm thick and a rectangular size of 595x595mm.

For that seamless indoor to outdoor feel, 9mm thick indoor versions of the same tiles and finish are available for that perfect match.

Use on your walkway, patio, terrace or raised deck area, these tiles will work well with other building materials and natural stones, without the worry of discolouration of the tiles or the effects of staining.

# GROUND

## HYDRAULIC CEMENT COLLECTION

**Ground is a collection inspired by the feel and look of cement applied to a cotto structure.**

The fusion between urban and traditional style has created a product with unique characteristics. This modern vintage look fits in with the current revival trend by using graphics associated with hydraulic tiles, which are highly appreciated by our current architects and designers.

Cement, markedly urban, acquires a more traditional expression with the shape and texture of the surface. Ground tiles have a light structure, noticeable through the brightness of the surface, which creates the illusion of movement. This range has a subtle satin finish, making it smooth and pleasant to the touch.

The style of this flooring is inspired by the patterns of hydraulic tiles, which can be used to create highly customised environments. Use these to define your outdoor space with its quality detailing.

From traditional to modern, from rustic to minimalist, Ground can be used for all types of decoration and the style is dictated by the combination of elements.

# WILDWOOD

## WOODGRAIN TILE COLLECTION

**From the symbiosis between nature and human creation emerges a new concept of floor tiles that dares to defy the conventional - Wildwood.**

The Wildwood collection is characterised by its strong and distinct personality, which finds inspiration from such disparate elements as wood and cement.

A collection inspired by the beauty of wood in its pure form reinterpreted with the graphics of cement utilising a 60X60 square format with a natural and anti-slip finish available, in three different colours - Tortora, Light Grey and Grey - Wildwood is the solution for modern and contemporary spaces.

Create a natural timber finish to your outdoor space, without the worries of rotting, splinters or the need for treatment.

A vitrified product with all the benefits of a structural porcelain tile. Never worry about slippery timber decks again, Wildwood is your peace of mind alternative.

# Technical information

Versatile A1 fire rated, resistant and functional

## INTENDED USES

The characteristics of the product and the ease of installation, both with or without adhesive (dry installation on grass, gravel, or elevated floors), make the 20MM thick **PLAN SAFE GUARD Porcelain Tiles** from **PLAN DECK** the best solution for external flooring of public and residential areas such as urban spaces, pavements, garden paths, car parks, terraces, swimming pool edges, bathing facilities, parks and much more.

## Fire-rated solution

In consideration of the recent changes in building regulations regarding the use of building materials externally. **PLAN SAFE GUARD Porcelain Tiles** is the safe and legislative choice for balcony and terrace finished flooring. When used with our fire-rated support substructure such as **PLAN DECK Aluminium Subframes**, a complete fire retardant solution can be created with ease and within budgets.
